

Statement to the II Congress of the League of Young Communists USA:

Dear comrades,

In these hard times of inequality, a collapsed economic system and an unorganized working class, it is encouraging to hear about you and your struggle in the heart of the beast. US imperialism has destroyed nations and peoples across the globe, and because of capitalism we face a climate emergency that threatens to end with life as we know it. The Spanish State and the USA have many things in common: both are authoritarian countries that maintain an oppressive system towards ethnic minorities and the wide working class movement. Both embrace anti-communism as a major aspect within their bourgeois ideology. Both are NATO members and represent the interests of big corporations that organize coups d'état and introduce criminal governments in the Global South. Spain is a post-fascist state with a bourgeois parliamentary system where the Left-Wing Francoists and the Right-Wing Francoists pretend to solve the problems of a proletariat that has nothing to lose but their chains: our chains.

As communists, working class liberation is our main goal, and for that purpose we need to oppose the authoritarian regimes ruling our nations. The Native American resistance, the Black liberation movement, the Amazon trade unionists: those are examples of a different USA. We all belong to the same class and we will conquer the socialist future together, in America and Europe, and with our comrades from the rest of the world.

Capitalism is collapsing and now it's time to fight back for our complete freedom, following the praxis that we learnt from Marx and Engels, from Lenin, from Fidel and so many others. Your commitment to marxism-leninism and true revolutionary spirit are welcomed by the whole communist movement.

Long live the League of Young Communists of the USA,

Long live the struggle for socialism,

Venceremos,

Saúde e Terra,

Comradely,

Lorena Serantes,

Vigo, Galicia, Spain
