

## **Greetings to the Second Congress of the League of Young Communists USA**

Dear comrades,

In the name of the leadership and bases of the Syrian Democratic Youth Union, we extend our warmest comradely greetings to you, as you are about to hold the second conference of your youth organisation in extremely complex and dangerous circumstances, which gives this conference special importance to continue the anti-imperialist struggle. Especially since you are engaged in this confrontation, as Guevara used to say: In the belly of that American imperialist beast. And this beast is getting fiercer, more aggressive and savage because he has begun to realise that his empire has begun to decline, and on this basis, he is expanding his military alliances and forming new alliances and working to create hotbeds of tension to get out of his crises at the expense of world peace and at the expense of thousands of victims in the imperialist wars of oppression that have always been around the world.

We salute you from Syria, whose people are struggling against the fiercest imperialist campaign in its post-independence history. A campaign that has been going on for over a decade, in which all means of proxy war and disinformation were used, alongside with the support and arm of troops of obscurantist extremists, a method that imperialist forces have always adopted everywhere, by providing support to extremist right-wing fascist organizations since the first half of the 20th century, when the imperialists created fascism in Europe to confront the young, back then, Soviet state; and later created Taliban and Al-Qaeda; the Lebanese Phalangists; not forget the unlimited support to the Zionist entity the most aggressive in the region, as well as ISIS and its like in Syria and Iraq; all the way to the fascist organizations in Ukraine and many others around the world today. However, our people along with with the help of their sincere friends, were able to defeat the takfiri fascist obscurantist forces in Syria. That is why the United States of America and its reactionary allies resorted to the economic blockade to suffocate Syria and deprive her and her people of the most basic necessities of life. The imperialist powers imposed occupation (the Turkish occupation via its obscurantist mercenaries in the north, as well as the American occupation along with its agents, the so-called "Syrian Democratic Forces" ) on a section of the land that is one of the richest lands in Syria

with the aim of controlling and looting the resources that belong to the Syrian people. What increases the impact of that siege is the adherence to the neo-liberal economic orientation of the Syrian governments during the years of war, against which Syrian communists and the loyal progressives are fighting the fiercest battles.

Yes, comrades, our struggle is one against capitalism, which is in its highest stage, as described by Lenin. We are confident that you will put a programme of struggle around which the most loyal and progressive youth will rally to build a better tomorrow, a tomorrow in which there is no place for racism, exploitation and deprivation, a tomorrow in which poverty does not surround your youth to fall into the arms of crime or in the ranks of an imperialist army to fight wars in which they die or kill innocents for the interests' sake of the ruling monopolies in the US. We have every confidence, comrades, that we and you and the revolutionary militants around the world will build a tomorrow in which there is no room for capitalism so that the coming generations will enjoy peace.

**Comradely salute the delegates of the Second Congress of the League of Young Communists USA!**

**Long live our common struggle for a better tomorrow!**

**Long live international solidarity!**

**Executive Bureau of the Syrian Democratic Youth Union**

**Damascus 12/8/ 2022**
