SOLIDARITY GREETINGS TO THE LEAGUE OF YOUNG COMMUNISTS-USA ON THE COMMEMORATION OF THE EVENT OF THEIR SECOND CONGRESS.

Receive our revolutionary, solidarity greetings, and our salutes to your continued commitment to the struggles of the oppressed people in the world.

The Young Communist League of Kenya acknowledges our continued collaboration and the establishment of a firm friendship within our organizations. We take this opportune chance to congratulate the League of Young Communists in the USA for this bold step, and an expression that young people all over the world, have understood and are awakening against the oppressive establishment. The Congress is a great step towards the defeat of the reactionary forces that have, for a long time now continuously strangled the attempts of revolutionary forces towards a common development.

As the society develops towards socialism, we have witnessed attacks on socialism from the western forces, in which our people, in America and the western front continues to fight against. We have witnessed continuous economic exploitation of the workers of the world, and the political exploitation manifesting through the imperialist clench on the resources of our people. Massive economic breakdown in most countries, unprecedented subjection of poor working conditions, unemployment, poor healthcare, lack of housing, amid other conditions.

It would be much difficult for you comrades, who happen to be at the center of the belly of the beast, but that should not be a worry of comparison, but a signal of hope. History has accorded you a generational task to fight imperialism, with all your strength, skill and might. The most important task happens to be solving the problems of the people. The first step towards getting there, with the dialectical lenses of the development of the society, is creating an organization, which you have religiously held, passionately. The organization is the arm of the proletariat, galvanized with the dearly important ideological guidance of Marxism-Leninism. To continuously fight against aspects of revisionism, opportunism, and factionalism within our organizational ranks.

We declare our support and commitment to the deliberations of your second congress and the continuity of the deliberations, with your political program.

Relay our greetings of support to the League, and declare a stride towards the collapse of the capitalist system and a journey towards building a socialist society.

Long Live the LYC-USA!

Long Live the Proletariat internationalism!

Long Live Socialism!

General Secretary,

Young Communist League-Kenya.
