HANDS OFF RAUL, HANDS OFF CUBA!

The **Party of Communists USA** condemns, in the strongest possible terms, the provocations of US imperialism against People's Cuba. Since the victory of the Cuban Revolution in 1959, US imperialism has always hated the idea that there was a socialist government 90 miles from its shores. It is important for the US to show that there are no other alternatives to the capitalist system because capitalism is in a deep economic crisis. Capitalism goes through booms and busts with each bust getting worse and worse. Cuban socialism has proven to be a long-term alternative to the present economic system in the United States. The **Party of Communists USA** continues its support for existing socialism in Cuba, **never forgetting the disastrous Batista days for the Cuban people before the Revolution**. With Cuba, our Party says: Patria o muerte, venceremos!
